

ENVIRONMENT PROTECTION

POLICY

MAN-GEN-0000-PHI-0010

Dietsmann is concerned with the protection of the environment from the impacts of its activities and services. We are engaged in identifying and preventing all potential negative impacts.

Dietsmann upholds the United Nations Global Compact Charter as well as the Rio Declaration on Environment and Development and strives to minimize the Company's environmental footprint.

Towards this end, Dietsmann undertakes to:

- Assess, quantify and monitor its environmental impacts;
- Ensure that regulatory requirements and Dietsmann standards are respected by executing periodic environmental inspections and audits and by deploying environment management system on all sites;
- Aim for zero environmental incidents throughout its sites;
- Conduct all activities in full compliance with international and national standards as well as with client's requirements;
- Communicate environmental impact assessment and reports to employees and clients;
- Develop and implement an environmental culture by proposing appropriate training and awareness campaigns;
- Reduce the amount of waste production; promote and maximize the percentage of waste which is recycled;
- Minimize the release of pollutants into the air, water or soil as much as possible;
- Reduce emissions, noise, dust, odor and other element that may damage the environment;
- Identify energy saving initiatives to reduce its energy consumption;
- Maintain the ongoing objective of continuously improving its environmental performance;
- Implement a crisis management plan for emergency pollution situations, periodically reviewed and improved.

This policy is communicated and applies to all employees and contractors working on behalf of Dietsmann.
